1. Introduction

Anant Grid Private Limited (AGPL) envisions a future where sustainable power transmission becomes a driver of inclusive growth, enabling cleaner energy access for all. AGPL understands that a transmission project is inherently exposed to sustainability and climate-related risks and thereby can be subject to substantial long term social and environmental challenges. AGPL aims to minimize ecological impact and maintain the highest standards of transparency by embedding environmental stewardship, social responsibility, and ethical governance. AGPL integrates Environmental, Social and Governance (ESG) responsibilities into the core of its business operations.

2. Scope

The ESG Policy is applicable to all AGPL operations, projects, employees, contractors, suppliers, and business partners, and serves as a guiding framework for integrating ESG principles into all business activities and decision-making processes. This ESG Policy shall apply throughout the transmission project lifecycle, including bidding, project planning, land procurement, construction, operation & maintenance and decommissioning phase.

3. Objective

The ESG Policy underscores AGPL's commitment to responsible and sustainable infrastructure development. It ensures:

- Protection of the environment and biodiversity
- Promotion of societal well-being
- Adherence to strong corporate governance standards

AGPL manages sustainability and climate-related risks in strict compliance with Indian laws and aligns its practices with internationally recognized frameworks, including Good International Industry Practices (GIIP), NIIF SRI Policy & Principles (2025) and the International Finance Corporation (IFC) Performance Standards (2012).

4. Policy Commitment

Anant Grid has developed and adopted the ESG policy governing environment, social, health & safety and governance aspects which is endorsed by its Board of Directors. The ESG policy has the following commitments:

Environmental Responsibility

- **Regulatory Compliance**: Ensure compliance with all applicable local and national environmental laws, regulations, and standards.
- **Risk Assessment**: Conduct environmental and social screening, along with required studies, to identify, assess, and mitigate environmental risks across all transmission projects.
- **Biodiversity Protection**: Safeguard biodiversity and natural habitats by applying the mitigation hierarchy to avoid, minimize and restore.
- **Climate Integration**: Integrate climate considerations into the overall business strategy to address long-term sustainability goals.
- **Community Health & Safety**: Maintain community health and safety by adopting applicable design & construction standards to minimize environmental and safety risks, ensuring compliance with GIIP and relevant national regulations.
- **Workplace Safety Standards**: Maintain safe working conditions, equipment, and practices to prevent accidents, injuries, and occupational hazards.

Social Responsibility

- **Fair Labour Practices**: Uphold fair labour standards by ensuring non-discrimination, equal opportunity, and safe working conditions for all employees, contractors and business partners.
- **Grievance Redressal and Consultation**: Establish effective grievance redressal mechanisms (GRM) and conduct meaningful stakeholder consultations with workers, communities, and investors to build trust and transparency.
- **Responsible Land Procurement/ Right of Way (RoW)**: Manage land procurement/ RoW responsibly by providing fair compensation for affected individuals and communities in compliance to central and state regulations.
- **Employee Well-being**: Promote physical and mental well-being by fostering a culture of safety, respect, and care in the workplace.
- **Respect for Indigenous Rights**: Safeguard the rights and cultural heritage of Indigenous Peoples, ensuring that impact on traditional practices or community well-being is suitably mitigated.

Governance and Accountability

- **ESG Integration**: Incorporate Environmental, Social, and Governance (ESG) considerations into corporate governance structures and risk management frameworks to strengthen long-term sustainability.
- **Audits and Monitoring**: Conduct necessary audits and monitoring to ensure compliance with IFC Performance Standards and investor requirements.
- **Transparency and Accountability**: Maintain transparent reporting and disclosure practices to stakeholders, reinforcing trust and accountability.
- **Ethical Oversight**: Uphold ethical conduct and integrity across all operations, with zero tolerance for corruption, bribery, or malpractice.
- **Continuous Improvement**: Monitor practices at each stage of the project lifecycle to drive continual improvement and ensure environmental protection remains central to decision-making.

5. Implementation

AGPL will implement the ESG Policy through its Environmental and Social Management System (ESMS) by integrating ESG requirements into project planning, approvals, procurement, construction, operations, maintenance and decommissioning. AGPL will develop a four tier governance structure (Tier-1: Board/ESG Committee, Tier-2: AGPL corporate, Tier-3: Project SPV/Project Management and Tier-4: Contractors) to approve, review and implement the ESG policy.

6 Communication and Disclosure

The Policy will be communicated through appropriate induction, training, contracts, internal channels and project engagement processes to the relevant stakeholders. The approved version will be made available on AGPL's website.

7. Policy Review and Approval

The Policy will be subject to periodic review and revision (at least once every three years) in line with the evolving regulatory and investor framework, business dynamics, and stakeholder expectations. AGPL is authorized to make any amendments to the Policy, as required from time to time, subject to approval by the Board.
